

GAS EQUIPMENT

TWO BURNER HIGH OUTPUT REGULATED STOVE - WITH DRIP TRAY

An output of 10,000 BTU from each stainless steel burner is guaranteed as the gas flow is regulated by an inline hose & regulator assembly and ensures that the stove performs in all conditions.

The hose and regulator assembly is equipped with a 3/8" LH connection for direct connection to external valve cylinders.

A redesigned gas valve system allows accurate adjustment of the burners from simmer to high with a smooth action, a stainless steel trip tray and inbuilt piezo ignition for easy operation and cleaning ensures a high performance stove with user friendly operation.

Part No	Size	Capacity	Gas Consumption	Burner Performance	Weight
2219	540 x 290 mm	2.5min/1ltr	185 g/h	10,000 BTU	5 kg
