

ETAPOWER™ MF

EtaPower™ is the new, highly effective fuel-efficient stove from PRIMUS. The stove's high efficiency rate allows for fast boiling times, less fuel consumption, a lower total weight, and all in all a more environmentally friendly stove. The stove comes with a burner stand, a windscreen, and a 2 litre EtaPower™ pot with heat exchanger and are made of hard anodised aluminium. The material is 20 times as hard as stainless steel. Other accessories that come with the EtaPower™ stove include a frying pan, a handle, and a bag that can even be used to insulate the pot.

With Primus EtaPower™ pots your stove becomes 50% faster a new more efficient. The pots can be used with any existing gas or multi fuel burner on the market.

EtaPower MF Is there a more effective, fuel efficient multi fuel stove? PRIMUS's new EtaPower MF stove once again positions Primus as the pioneer among outdoor stove manufacturers. This stove is based on the award-winning EtaPower EF, but it has been refined with a perfectly adjusted preheating coil, an improved burner, and a number of smaller changes from its predecessor. This allows the stove to be used with both LP gas and liquid fuels, such as white gas, gasoline/petrol, kerosene/paraffin, and if necessary even diesel. This in turn leads to even lower fuel consumption and a lower overall weight during hikes, paddling tours, and expeditions. The stove comes with a burner base, windscreen, 2.1 litre EtaPower pot with heat exchanger, frying pan, handle, ergo pump, 0.35 litre fuel bottle, multi tool, and a storage bag that can even be used to insulate the pot.

SPECIFICATION

Fuel: Diesel, Gasoline/petrol, Kerosene/paraffin and other petroleum based fuels

Ignition: Manual

Part No	Size	Output	Weight
32085	210L x 210W x 135H mm	2000W • 7000 BTU/h	830 g
