

GRAVITY MULTI FUEL STOVE

Gravity is probably the ultimate spider stove for white gas and kerosene. It's extremely stable, weighs little, and packs small. Our new "integrated Burner Technology" means that the stove is approximately 30% lower compared to similar stoves of this type. Despite this, Gravity is a powerful stove and pre-heats quickly thanks to its efficient pre-heating coil. The stove has four stable, foldaway legs making it useable with even larger pots.

Fuel Bottle sold separately

SPECIFICATION

Fuel: White Gas and Kerosene

Ignition: Manual

Part No	Size	Output	Weight
328084	101L x 101W x 40H mm	10,500 BTU/h	295 g
